Swabs, Doctors and Processes

“Medical Scandals” What is behind them?

Technical details:

136 page, hardcover

Format 16.5x22 cm

€ 19,90

ISBN 978-3-902552-98-3

Doctors before Judges

Beyond all the various accusations and recriminations by the media in the so-called “medical scandals” the question is still posed: Why and how do grave errors in treatments arise and what mechanisms could cause such catastrophic results?

In this book, experts explain, based on ten selective cases from Austria, Germany and Switzerland, why these incidents occur and how they continue through faulty treatment and the supportive structure.

These failures can teach us: The new CIRS medical mistakes report and registration reveals a new kind of approach to their source and if strictly applied, sloppiness and carelessness can be effectively averted.

Be Happy!

A Kit

Technical details:

152 pages, hardcover

Format 15x22 cm

€ 17,90

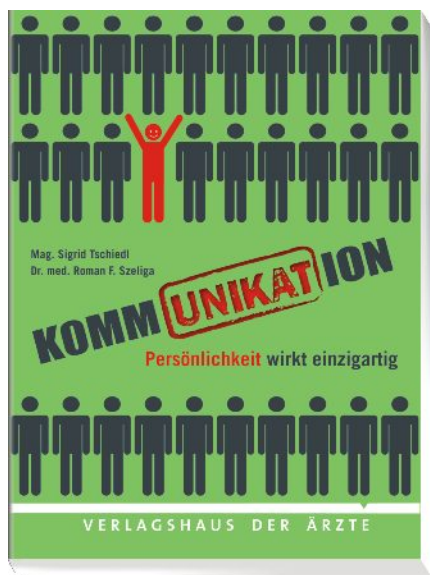

ISBN 978-3-99052-012-3

Happiness is possible.

The current ego-centric reasoning in economics, science and private life, impedes progress. An urgent about-face is necessary so that self-development is not confused with selfishness.

With the help of several meaningful examples, it is clearly shown that only by a non-personal standpoint is it possible to develop happiness and the essential conditions for a fulfilled life.

How does this function in practice? The authors show ways and offer suggestions for everyone. After all, it is really not so difficult to define and find happiness.

Sigrid Tschiedl, Roman F. Szeliga

CommUNICATION

Personality is Unique

Technical details:

206 pages, full colour, softcover,
Format 15x22cm

€ 19,90

ISBN 978-3-99052-000-0

The Stage is Open!

More expression makes more impression

The effect of a presentation is determined, in large part, by body language. It is not so much the content as the personality which delivers the meaning.

Of course there are those verbally talented, but good communication is not God-given; it can be learned. In this book, communication processes are made clear: the impetus to reflect and how to adjust the art of your own personal presentation style.

Numerous concrete exercises make the theory tangible.

Marianne Hahsler

Katzten

Soul-friends and Therapeutic Helpers

Technical details:

168 pages, full colour, hardcover
Format 16,5 x 22 cm

€ 19,90

ISBN 978-3-99052-001-7

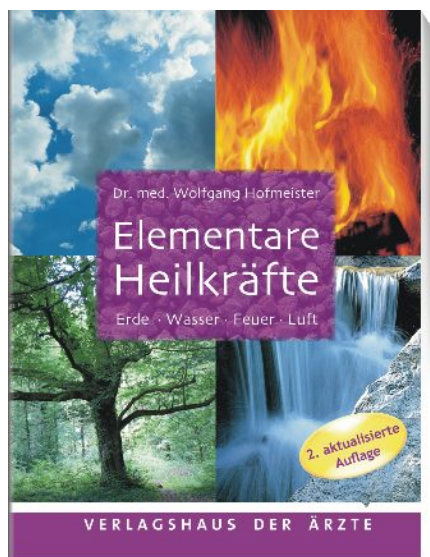

With four soft paws to therapeutic success

While animal supported education and therapy with dogs and horses is generally well-known, the number one house pet is not given any notice.

It is an injustice that the "house tiger" who avails an extraordinary potential for healing in the areas of occupational, physical and psychotherapy, should be so warily promoted. Numerous innovative examples for kindergartens and grade schools, as well as disabled and elderly-care, show the possibilities and limits of this therapy.

The therapeutic training should be appropriate to the species and the duration of it must be considered. These are aspects which might overburden them and only a satisfied animal can be a therapeutic one.

Elemental Healing Powers

Earth-Water-Fire-Air

Technical details:

Second revised edition
128 pages, full colour, softcover
Format 16,5 x 22 cm

€ 19,90

ISBN 978-3-99052-001-7

Pillars of Well-being

What appears to be esoterically charming, turns out to be at closer study, helpful guidance for daily life for the maintenance of your own health - and not just at the physical level.

A guide for new methods using our natural environment and your own resources to keep our bodies in good condition. Use this simple and natural preventative healthcare advice to mobilize your own self-healing powers which you can feel and measure.

Based on medical facts, the author shows how all of us, through the observation of nature, can effectively increase our self-healing powers.

What's Wrong with my Child?

Recognizing illnesses and their Treatment

Technical details:

Second revised edition
444 pages, full colour, hardcover
Format 16,5 x 23,5 cm

€ 24,90

ISBN 978-3-99052-002-4

Competent references for Parents

An evident iron-clad law says children get sick on the weekend. However, on other week-days anxiety is high: Should I take my child to the doctor or can I wait? Are the visible symptoms a clear indication of a more serious illness or just the sign of a slight disturbance?

This reference work offers a detailed index and thorough overview of what might indicate a need to rush to the doctor or what might be treated with several home remedies.

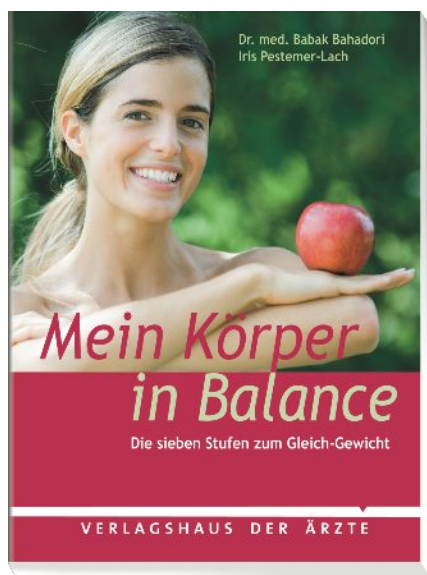

Moreover, there are valuable tips on questions of child-rearing, for instance, issues which young adults will be confronted, like functional disturbances, smoking or drugs.

...a perfect reference book...

Die Presse

With this outstanding information about the latest status of research, it will be easier to make decisions about your child.

€ 14,90

ISBN 978-3-99052-004-8

Living in Harmony and Equilibrium

More and more people in our society suffer from over-weight, stress, metabolic disturbances and other similar ailments. Is this a vicious circle? No, there is a proven method to lead a more enjoyable life.

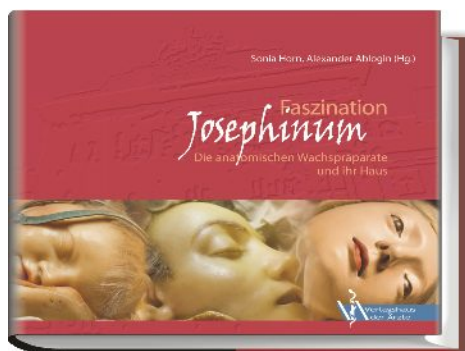

Neither diet nor a particular worldview is necessary. Here are seven easy steps which involve elements of biorhythm, movement, metabolism, nutrition, water, optimum daily activities and relaxation for self-discovery.

Every level is extensively explained step by step, combined with numerous exercises which promote simple and lasting transformation.

Hundreds of successful treatments speak to the quality of this method
LiesMalWieder.de

This book is an excellent compendium of various relevant points to stay slender and in shape. Above all, it is not written just for "experts".

Fascinating JOSEPHINUM

The Anatomical Wax Preparations and their Housing

Technical details:

160 pages, full colour, hardcover

€ 19,90

ISBN 978-3-99052-005-5

The Fascinating Josephinum

Founded in 1784 in Vienna, the Josephinum is one of the most significant medical teaching collections in the world. Produced in Italy, these wax preparations have served generations of doctors as valuable objects of observation in the study of the human body.

The fascination with this collection continues today and is reason enough to devote a book to its creation and magnificent meaning and origin.

Recent large-formatted photos are a shining example accompanied by text based on the most advanced scientific knowledge which rounds the book out.
